REACH Customer Statement

Dear customer,

REACH* (Registration, Evaluation, Authorisation and Restriction of Chemicals) is a new EU chemical regulation which was introduced on June 1, 2007, with an implementation deadline of 2018.

REACH enforces review of chemicals, identifying the associated health & environmental risks and ensures that information is communicated to suppliers and downstream users. The first deadline for the pre-registration of substances runs from June 1st to December 1st, 2008.

In line with Stanley's commitment to environmental responsibility, the company takes a proactive approach towards legal compliance, especially with regards to human health and the environment.

Under the REACH regulation, Stanley Europe is taking the necessary steps to prepare pre-registration where required.

These steps include:

- Implementation of an action plan.
- Product assessments (where required) to ensure pre-registration by December 1st 2008.
- Downstream communication regarding usage of Substances of Very High Concern (SVHC) in our articles.
- Downstream communication (6 months in advance) in case of discontinuation of products arising from the REACH regulation.

For other questions regarding our approach towards REACH compliance within our European organisation you can contact the following person:

Yves Collette
